|---|---|
| **Main role(s)** | **Frontend Engineer and Fullstack Web Engineer** |
| **Technologies** | **JavaScript, TypeScript, React, React Native, Next, Angular, Node, CSS, Java, Spring** |
| **Also** | **Worked as Mobile Developer and Blockchain Developer** |

## Experience

**TLDR:** Senior Engineer with +7 years of xp. JavaScript Ecosystem with many of its libraries and tools. A bit of Java. In leading positions a few times and supervisor and tutor twice.

**Front End Engineer** (Freelance), **SageByte**    SageByte

`React`  `Redux`  `JavaScript`  `Firebase`  `Firestore`                    2024

➢ Web Applications development, enhancing user experience and performance, with React

➢ Collaboration on the implementation of a book social media app

➢ Key Responsibilities: Development, Testing, Architectural co-design and Deployment

**Front End Development Study and Practicing, Self Education**

`React`  `React Native`  `NextJS`  `JavaScript`  `CSS`                    2023

➢ Actively pursuing self-study and projects to continuously enhance skills in FrontEnd Development
➢ Mastering React.js and improving on React Native
➢ CSS
➢ Next.js
➢ AI learning

**Front End Engineer** (Freelance), **SageByte**    SageByte

`React`  `Redux`  `JavaScript`  `Firebase`  `Firestore`                    2019 - 2021

➢ Web Applications development, enhancing user experience and performance, with React

➢ Collaboration on the development of a Betting app, ensuring performance and successful deployment.

➢ Key Responsibilities: Head of Development, Testing, Architectural co-design and Deployment

**Fullstack Web Engineer, NAU21**

`TypeScript`  `React Native`  `React`  `Node.js`  `Angular`  `Ionic`  `Java`  Spring        2017 - 2023

➢ Developed and maintained a Financial Mobile Application for a prominent Dutch client, establishing and nurturing a long-term partnership

➢ Web App development of an in-house product. The app was later deployed into production for big Insurance Companies

➢ Understanding TypeScript

**Udemy**                              2024

➢ NodeJS - The Complete Guide

# Portfolio

- My **GitHub:** https://github.com/gilvicentevieira
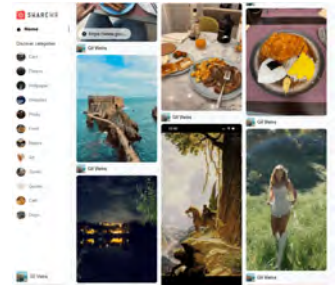

I have some projects on my GitHub that you can see, for e.g. :

- ShareMe - A clone of Pinterest

- GeniusGPT - A clone of ChatGPT

- Jobify - A visually appealing application to log and visualize job applications

## Simplistic HTML5 videogames

In 2014 I developed 5 simplistic HTML5 videogames. And this side project and experience inspired me to make myself a Software Engineer

## More about me:

I have Recommendation Letters from the companies that I've been with.

**Interests:** Continuous learning and improving. Reading. Exercising. Sun and nature.

**Strengths**: Persistance and resilience. Critical thinking. Team player.

**Weaknesses**: Too honest at times. Lazy at times.

**Languages**: Portuguese - Native; English - C2 according to test; Spanish - B1.
